### Specifications

**Maxell Projectors**

**MC-CW301**

**Display System:**
- 3LCD

**Power Consumption:**
- AC 100 - 120 V (50 / 60 Hz), 3.5 A
- AC 220 - 240 V (50 / 60 Hz), 1.7 A

**Power Requirement:**
- AC 220 - 240 V, 1.7 A
- AC 100 - 120 V, 3.5 A

**Operating Temperature:**
- 35 - 40 °C

**Design and Specifications:**
- Subject to change without notice.

### Accessories

- Remote control
- AA batteries
- Power cord
- Computer cable
- Lens cover
- Strap

### Mounting Accessories

- HAS-P100 (Fixing adapter for high ceilings)
- HAS-203L (Fixing adapter for low ceilings)
- HAS-P302 (Fixing adapter for wall mount)

### Performance

- Typical screen size (diagonal):
  - 60 in: 1.5 m (59.1")
  - 70 in: 1.8 m (70.9")
  - 80 in: 2.0 m (78.7")
  - 100 in: 2.5 m (98.4")

- Screen size (diagonal):
  - 60 in: 1.5 m (59.1")
  - 70 in: 1.8 m (70.9")
  - 80 in: 2.0 m (78.7")
  - 100 in: 2.5 m (98.4")

- Projection distances:
  - Short throw: up to 0.5 m (19.7")
  - Standard throw: up to 1 m (39.4")
  - Long throw: up to 1.5 m (59.1")

### Features

- Super Short Throw Projector

These projectors achieve a projection on a 2m (80") screen at a distance of 94.6 cm (37.2")

These projectors achieve a projection on a 2m (80") screen at a distance of 94.6 cm (37.2")

*MC-CX301

*Projected images are simulations.
ACCENTUALIZER makes pictures look more real by enhancing (1) Shade, (2) Sharpness and (3) Gloss to make pictures as clear as pictures on a flat-panel device. You can also adjust the effects by three levels according to your surroundings so that the colors of projected images are the actual colors of the objects they represent.

When average projectors are used in bright rooms, the darker colors of an image deteriorate and images become unclear. Using this function, blurred images caused by room lighting or outside light sources are corrected, and an effect similar to increasing contrast occurs. This results in clear images even in bright rooms.

HDCR (High Dynamic Contrast Range)

Image Optimizer

Equipped with IMAGE OPTIMIZER, that maintains visibility of an image through automatic image correction in accordance with lamp condition. *This function may not work properly when HDCR/ACCENTUALIZER is ON.

When average projectors are used in bright rooms, the darker colors of an image deteriorate and images become unclear. Using this function, blurred images caused by room lighting or outside light sources are corrected, and an effect similar to increasing contrast occurs. This results in clear images even in bright rooms.

Blackboard / Whiteboard modes

Improve image quality when you project onto a blackboard or whiteboard, ensuring optimum visibility.

Go Green

Saver Mode

This feature developed by Maxell, based on ImageCare® technology, reduces the lamp brightness and consumption power, resulting in considerable energy savings. The saver mode automatically activates when the projected image does not change in the preset time (1 to 30 minutes). You can also activate the saver mode manually with the remote controller.

Intelligent Eco Mode

This feature developed by Maxell, based on ImageCare® technology, automatically changes the lamp brightness according to the input signal level. The lamp brightness is reduced when a darker image is projected, and returns to normal when a brighter image is projected, eliminating unnecessary energy consumption from the lamp.

Network Function / Capability

Wireless Capability (Option)

The projectors are capable of a wireless network with the optional USB wireless adapter. You can control the projector with a computer via the network, and also project the screen of the computer on which the LiveViewer software is installed.

Projector Monitoring and Control

Manage and control multiple projectors over your LAN with Centralized Reporting, Scheduling, E-mail Alerts, and My Image (Image Transfer).

Moderator Control Mode

Setting one computer from the multiple computers (up to 50*) that are connected to the projector as the moderator (host) makes it possible for the moderator to project from all the computers (clients).

Multi Projector Mode

You can project the same image from up to 12* projectors simultaneously. This is useful for meetings and lectures in large venues where a single screen would not be sufficient.

E-mail Alerts

E-mail notification is sent for routine maintenance and error conditions.

Easy Schedule Setting

You can schedule routine and special projector events, including power on, power off, input selection and other settings.
